

STEVE WESTLY
California State Controller

July 30, 2003

**To the Citizens, Governor, and Members
of the Legislature of the State of California:**

I am pleased to submit the 51st edition of the *School Districts Annual Report* for the 1999-00 fiscal year. These records are published to assist governmental and private organizations in managing and planning for the state's school districts. I trust that parents, educators, and taxpayers who work to improve the condition of our state's education system will find this information helpful.

Clearly, California's future depends upon a strengthening of our public school system. It is imperative that the tax dollars invested in education are managed with the utmost care. The information provided in this report is intended to facilitate informed decision making that promotes the best interests of California's children.

California continues to spend more on education. School districts' expenditures increased 10% for the 1999-00 fiscal year, following the previous year's 7% increase. We must also continue to review those expenditures to ensure that the resources provided are being spent prudently, and in the best interests of California's students. Knowing that today's students will be tomorrow's workforce, Californians must make the necessary decisions to appropriately invest in the education of our children.

The accounting and reporting procedures utilized in preparing this report are in accordance with the standards set by the *California School Accounting Manual*. The data cover the 1999-00 fiscal year and include figures for elementary, high school, and unified school districts, as well as county offices of education and joint powers agencies.

In an effort to enhance the value of the information presented, my office is taking progressive actions to improve the timeliness and availability of this annual report. I would like to thank the officials who reported this data at the local level, as well as the California Department of Education, which collected it and made it available for this report, and my staff, whose hard work made this report possible.

Sincerely,

A handwritten signature in cursive script that reads "Steve Westly". The signature is written in black ink and is positioned above the printed name.

Introduction

This publication presents the financial transactions of California's school districts, county offices of education (COEs), and joint powers agencies (JPAs) as required by Government Code Section 12463. Government Code Section 53892.1 requires these agencies to furnish annual attendance and financial reports to the California Department of Education (CDE). The CDE then provides the information to the California State Controller's Office.

Classifications of revenues and expenditures are in accordance with the account classifications prescribed in the *California School Accounting Manual*, 1998 Edition (ISBN 0-8011-1376-8). The differences between ending fund balances and the subsequent year's beginning fund balances are attributable to prior year audit adjustments and restatement of beginning fund balances. Material variances in financing sources, uses, and capital outlay may occur from year to year, primarily due to nonrecurring activities.

Statewide revenues and expenditures are presented exclusive of interagency and interfund transfers in this introduction. This is done to avoid duplicate reporting of revenues and expenditures, which would result in overstating statewide totals. Summarized financial information is listed by fund in Tables 1, 2, and 3.

Tables 1A, 2A, and 3A are included in this publication to disclose the transactions of the Self-Insurance, Warehouse Revolving, and Retiree Benefits funds. These transactions are also accounted for in the General Fund; they are excluded from the statewide summaries in this introduction to avoid duplicative reporting.

General information for each school district, COE, and JPA is presented in Tables 4 through 9. General information includes average daily attendance, long-term debt, total revenues, total expenditures, and ending General Fund balances, where applicable. The General Fund is the primary operating fund and accounts for all financial resources except those required to be accounted for in a specific fund. Average daily attendance is not applicable to JPAs. The appropriations limit and the appropriations subject to the limit are presented in Table 10.

School Districts

This report contains financial information for the 1999-00 fiscal year submitted by all 983 school districts. This total consists of 566 elementary school districts, 87 high school districts, 325 unified school districts, and five common administration school districts. Summary data for school districts' funds are presented in Tables 1 and 1A. General information for each school district is presented in Tables 5 through 7, and includes average daily attendance, long-term debt, total revenues, total expenditures, and ending General Fund balances.

County Offices of Education

In addition to the many requirements involved in administering schools within their jurisdiction, county superintendents of schools are also responsible for maintaining a balanced budget of their schools' funds. Summary information for the funds of all 58 COEs may be found in Tables 2 and 2A. General information relating to each COE is presented in Table 4 and includes average daily attendance, total revenues, total expenditures, long-term debt, and ending General Fund (County School Service Fund) balances.

Joint Powers Agencies

The Joint Powers Act allows school districts to exercise existing powers by cooperative action. Section 41023 of the Education Code requires COEs and those JPAs consisting solely of school districts to file financial statements with the CDE. The JPAs are subject to the same standards as school districts and COEs. The information contained in this report includes revenues and expenditures for activities such as the operation of regional occupational centers and programs, special education programs, and pupil transportation services, as well as other cooperative services.

Summary information for 52 JPAs may be found in Tables 3 and 3A. General information relating to each JPA is presented in Table 8 and includes total revenues, total expenditures, long-term debt, and ending General Fund balances.

Average Daily Attendance

The average daily attendance (ADA) is a significant factor in the models used to allocate funds within California's education system. The average daily attendance by school district type, excluding classes for adults, is shown in Figure 1 for the 1999-00 and 1998-99 fiscal years.

Five-Year Trends

During the 1999-00 fiscal year, in the aggregate, school districts and COEs expended less than total revenues, building a positive reserve, whereas JPAs expended significantly more than their revenues, making up the difference through interagency transfers. Total revenues amounted to \$47.2 billion, an increase of 10.55% over the 1998-99 fiscal year. Expenditures totaled \$44.8 billion, an increase of 10.09% over the previous fiscal year.

Revenues and Expenditures

Figures 2 and 3 represent a five-year comparison of the total revenues and expenditures reported by school districts, COEs, and JPAs. Figure 4 displays the trend over the past five fiscal years.

Appropriations Limit

In November of 1979, California voters passed Proposition 4, known as the “Gann Limit,” which added Article XIII B to the State Constitution. Article XIII B was designed to limit the spending of local governments, including school districts. As a result, each school district, unless otherwise exempted, is required to compute a 1978-79 “base year” appropriations limit. Once the base year is calculated, the appropriation limit of each subsequent year is computed using the previous year’s limit, factoring in changes in the cost of living, population growth, and other adjustments.

Neither Article XIII B nor subsequent legislation assigned any state or local agency responsibility for assuring compliance with the mandates. In 1987 Senate Bill 813, Chapter 1025, added the requirement that the appropriations limit and the total annual appropriations subject to the limit for each school district and COE be included in the California State Controller's report.

During the 1999-00 fiscal year, the Gann appropriations limit exceeded the annual appropriations subject to the limit by \$1.4 billion. This is attributable to the appropriations limit increasing at a higher rate than tax proceeds appropriated for education purposes. The past five years are summarized in Figure 5. Appropriation limits for each school district are presented in Table 10.

Long-Term Debt

Long-term debt reported in previous editions of this publication was limited to general obligation bonds. This edition includes general obligation bonds, certificates of participation, capital leases, state school building loans, and other long-term debt. At the end of the 1999-00 fiscal year, school districts reported long-term debt amounting to \$13.5 billion, an increase of 14.1% over the previous fiscal year. See Figure 6 for a five-year comparison. Tables 4 through 9 present long-term debt for each school district.
